CURRENT MANAGEMENT OF AORTIC STENOSIS
- Low Flow, Low Gradient Aortic Stenosis
- Review of the Evidence
- Asymptomatic Severe Aortic Stenosis
- Review of Evidence of Treatment vs. Observation and How to Evaluate

CURRENT TREATMENTS OF MITRAL VALVE DISEASE
- Degenerative Mitral Disease
- When is Mitral Clip Appropriate vs. Surgery
- Rheumatic Case
- Balloon Mitral Valvuloplasty, Surgery, and Imaging: Decision-Making on What’s Most Appropriate
- Echo and CT Imaging in the Mitral Valve

CURRENT MANAGEMENT OF THE AORTIC ROOT AND AORTIC INSUFFICIENCY
- Aortic Root Case
- Guideline Recommendations of the Dilated Aortic Root
- Surgical Options Available
- Aortic Insufficiency
- Indications and Imaging and Assessment of Severity, Repair vs. Replacement Strategies

EMERGING THERAPIES FOR THE FORGOTTEN VALVE: TRICUSPID VALVE SURGERIES AND INTERVENTIONS
- TR Case
- Imaging of the Tricuspid Valve
- Etiology and Physiology of Tricupid Regurgitation
- Current Management of TR

NON-INVASIVE IMAGING FOR DISEASES OF THE AORTA: NOT CREATED EQUAL?
- Why are There Differences in the Guidelines?
- Patient with Bicuspid Aortic Valve
- Mild Aortic Dilation and a Patient with Marfan

OPTIMAL TREATMENT OF MITRAL REGURGITATION IN HEART FAILURE
- Coronary Disease: MR and Secondary MR
- Role of MR in Heart Failure Including Proportionate vs. Disproportionate MR
- Viability and Reversability with MRI
